Switch-Pak™ AX13
with Compact Level Controller

FLOWLINE™
LEVEL BEST

Application

The general purpose level switch package provides high or low liquid level detection with one 16A compact relay controller for pump or valve shut off. The optional flash alarm brings attention to alarm conditions. Available in three level sensor technologies, choose the sensor type based upon your application media. This PP or PVDF level switch package is selected for bulk storage, IBC or drum, and neutralization tank applications, requiring detection and control.

CE IP65

Features

- Fail-safe relay shut off of pumps or valves with adjustable time delay
- Offered in three sensor technologies for broad application coverage
- Rugged polypropylene or PVDF construction for use with corrosive liquids
- Easy setup with LED indicators for sensor, power and relay status
- Optional strobe brings immediate attention to level alarm conditions
- Polypropylene enclosure rated NEMA 4X with swivel base for conduit alignment
- Invert switch changes relay state from NO to NC without rewiring

Key Benefits

- Complete solution to shut off a pump or close a valve to prevent overflows or run dry - just add power
- Available in three sensor technologies and two materials for all types of liquid media

NOTES

1) Select the best level sensor technology based upon your application.

2) Vibration is only available in PP material with a Ryton® sensor body.

3) CE compliance is only availabe in the non-strobe configuration.

4) Specify the A-dimension at the end of the part number (ie: AV13-4223-17"). The dimension may be specified in 1/2" (1.3cm) increments from 6" to 10' (15cm to 3m).

5) To calculate the length adder, round up the A-dimension to the next foot (30cm), multiply it by the selected material, and add that sum to the price. For PP, add $20 per foot (30cm). For PVDF, add $100 per foot (30cm).
